Number of shrimp: 1102 *Litopenaeus vannamei* broodstock

Number of Boxes: 124

The Pacific white shrimp, *Litopenaeus vannamei* at the Oceanic Institute of Hawaii Pacific University have originated in Hawaii and derived from specific pathogen-free (SPF) populations of broodstock in Hawaii.

The *L. vannamei* at the Oceanic Institute of Hawaii Pacific University have been periodically evaluated by polymerase chain reaction (PCR) for IHNV, WSSV, TSV, YHV, BP, MBV, IMNV, MoV, HPV and NHP for over 24 continuous months. The most recent samples were collected on December 30, 2015. The test results indicate that the shrimp populations at this facility are free of these pathogens. The shrimp at this facility tested negative for AHPND/EMS and EHP on December 30, 2015.

Sincerely,

Lei Yamasaki DVM, MS
